Notes:

This curriculum diagram illustrates the recommended programming of courses for a student without previous college experience. Students transferring with collegiate credit should review their program of study with their faculty advisor.

It is intended that this curriculum diagram be used in conjunction with, but not supercede, the 2005-07 University catalog.

Courses are not always offered during the quarter indicated on the diagram. Verify availability with current quarter University class schedule.

General education and breadth courses must be selected in accordance with University and Department requirements. Refer to the University Catalog for a comprehensive listing of general education and breadth courses and their prerequisites.

Example:

Course Title
COURSE NO.
(Prerequisites)

Prerequisites must be completed to advance. Prerequisites, where required, are identified in brackets for each of the courses offered in AGB. Please complete AGB concentration courses early to prepare you for Senior Project.

NOTE: A 300-400 level class in the life sciences may be substituted for a C-3, D-2 or D-4b course.
